

BULK TRANSFER

Hulcher Services transfers bulk commodities such as grain, fertilizer or food materials with our specialized Neuero® Hi-Rail Transfer Vacuum Truck.

The transfer vacuum truck is particularly valuable for grain and food facilities, moving grain, fertilizer, pellets and other food product material out of and into rail cars, trucks, storage bins and grain silos.

These hi-rail vacuum trucks are designed to move product at a 2,500 bushel capacity rate per hour.

The Neuero® Hi-Rail Transfer Vacuum Truck is equipped with 550 feet of 8-inch aluminum tubing and a variety of collection nozzles to facilitate transfer of various materials over large areas. The truck is also fitted with hi-rail gear so it can perform transfer and clean-up in remote areas not accessible by roads.

Hulcher's vacuum truck operators are railroad specialists. They have received training in railroad applications, are current in safety and security certification requirements for all Class I railroads and have spent years perfecting their craft in maintenance-of-way environments.

Hulcher provides superior bulk load transfer services for grain facilities and the railroads with the Neuero® Hi-Rail Transfer Vacuum Truck. When your bulk transfer project calls for a hi-rail transfer vacuum truck that is properly equipped and expertly operated, call Hulcher at 800-637-5471.
