

DRIFTWOOD CLEANUP

Driftwood represents a serious threat to the reliability of your bridge piers. Deploying crews and equipment to clear out this debris can be costly, and it may force you to redirect your limited maintenance-of-way resources from other important projects.

Hulcher Services offers a turnkey solution to this problem, providing all the necessary excavators, dump trucks and railroad professionals to remove and haul off driftwood from your bridge piers.

In some cases you can pre-schedule this work; our team can operate independently or support your maintenance-of-way crews seamlessly. In other instances you may need to act with little notice to

clear out the driftwood when water levels are low. Hulcher maintains a fleet of Caterpillar® equipment strategically located across the United States, with crews who can be deployed within 60 minutes of your call, 365 days a year.

Either way, Hulcher is ready to solve your driftwood problem with the same responsiveness and quality you've come to expect from all our railroad services.

Now is the time to clear out the driftwood and other debris from beneath your bridges to keep them safe and trouble-free - call Hulcher today.
