

FORKLIFTS

As a leader in Load Transfer / Load Adjustment Services, Hulcher Services maintains a fleet of specialized equipment including forklifts.

The forklift is used for Mechanical / Railroad Services, Transfer / Load Adjustment Services, Maintenance Services, Positive Train Control and Disaster Response.

Our forklifts have different lift capacities, but all are capable of delivering:

- Deraillment support
- Load reductions / load adjustments
- Load transfer services
- Post-spill clean-up services
- Transload services
- Construction, maintenance services and chore work

Our forklifts are maintained through Hulcher's multi-layered, proactive system of inspections and servicing that ensures our equipment is trustworthy and ready to go to work when you need it.

Forklifts can be deployed independently or in conjunction with other Hulcher equipment, like the dump truck, telehandler, wheel loader and conveyor.

Hulcher combines 30 years of Load Transfer / Load Adjustment Services expertise with one of the most extensive networks of people and equipment in North America. We are close by, with the right equipment and the most professional crew members in the industry, to respond to your load transfer and load adjustment needs.

When your Load Transfer / Load Adjustment Services project calls for equipment that is properly equipped, expertly operated and available when you need it, call Hulcher at 800-637-5471.
