

MOBILE COMMAND CENTER

The Hulcher Emergency Command Center offers a complete state of the art communication and office facility that can be mobilized to any natural and/or man made disaster within sixty minutes. This allows for a dedicated centralized office for the management and incident command functions that are critical to control these complex problems.

- Self contained power source - generators
- Individual work stations for up to eight people
- Dedicated multiple phone line system, which can also accept multiple phone line drops
- Dedicated cellular phone, copier and fax machine
- Three satellite TVs for monitoring news, weather and two-way radio communication with base and portable units
- TVs include a VCR for previewing safety videos and/or site images
- Separate conference room with seating capacity for ten people
- Command center can be used dually as an ER/Operations center and an administrative center, includes general office supplies
- Conference room contains multiple dry erase boards for planning sessions
- The conference room and work stations are separated by sliding glass doors for privacy. Each has its own climate control.
- Command center includes a refrigerator, microwave and coffee maker.
